

Top Senior Leadership & Technical Talent

Curated by WoodJobs – A Division of National Search Group

★ Candidate ID: EA254132 – Senior Project Manager

Why This Candidate Stands Out

A highly accomplished Senior Project Manager with extensive experience overseeing large-scale commercial millwork projects across hospitality, technology, corporate, and entertainment sectors. This candidate successfully manages a portfolio valued between \$20M–\$30M while coordinating cross-functional teams, vendors, and national general contractors to ensure profitable project delivery.

Key Highlights:

- Manages a \$20M–\$30M commercial project portfolio
- Oversees 2–10 simultaneous projects
- Extensive experience with luxury hotels, casinos, restaurants, and tech headquarters
- Strong P&L ownership and procurement expertise
- Deep knowledge of AWI, AWS, LEED, WI, and QCP standards
- Global vendor management and long-lead material coordination
- Strong risk assessment and contract administration capabilities

Scope of Expertise:

Project Management, Architectural Millwork, Cabinetry, Casework, Procurement, Vendor Management, Commercial Construction, P&L Management, Risk Assessment, Contract Administration.

Tools & Systems:

Bluebeam, Innergy ERP, Foundation, ShopPAK, Microsoft Office, CNC 3-Axis Programming.

Executive Summary:

A seasoned Senior Project Manager with extensive experience leading complex commercial millwork projects across multiple industries. Combines financial oversight, operational leadership, and technical expertise to consistently deliver profitable, high-quality projects.

Ideal For:

Architectural millwork firms, commercial contractors, and manufacturing organizations seeking a Senior Project Manager or Operations leader.

Candidate ID: AA174191 – Project Manager & Drafter

Why This Candidate Stands Out

A technically strong Project Manager and Drafter with extensive experience engineering architectural millwork for highly regulated and complex commercial environments. Their expertise in drafting, value engineering, and production optimization enables them to consistently deliver accurate, shop-ready drawings while supporting manufacturing efficiency.

Key Highlights:

- 95% commercial project experience
- Supported a landmark \$5M hospital project
- Delivers 1 major or 3 minor projects weekly
- Expert in AWI, AWS, and LEED standards
- Extensive architectural millwork and staircase experience
- Strong value engineering capabilities
- Highly proficient in production-ready engineering

Scope of Expertise:

Drafting, Project Management, Architectural Millwork, Shop Drawings, Value Engineering, Production Engineering, Commercial Construction, Cabinetry, Custom Stair Systems.

Tools & Systems:

Microvellum, Cabinet Vision, AutoCAD 2D, Bluebeam, ShopPAK ERP.

Executive Summary:

A highly skilled Project Manager and Drafter with deep expertise in architectural millwork engineering and production documentation. Combines technical precision with manufacturing knowledge to support efficient project execution and minimize production issues.

Ideal For:

Architectural millwork manufacturers, engineering teams, and commercial woodworking organizations seeking a Project Manager, Drafter, or Engineering professional.

Candidate ID: VIP228019 – Engineer

Why This Candidate Stands Out

An accomplished engineering professional with over 25 years of AutoCAD experience supporting large-scale commercial architectural millwork projects. Their expertise spans drafting, CNC programming, and submittal management across healthcare, hospitality, education, and institutional markets.

Key Highlights:

- 25+ years of AutoCAD experience
- Supported a \$21M religious temple project
- Extensive commercial project experience
- Strong shop drawing and submittal expertise
- Advanced CNC programming knowledge
- Extensive hardwood and composite material experience
- Managed highly detailed courthouse and institutional projects

Scope of Expertise:

Engineering, AutoCAD, Architectural Millwork, CNC Programming, Shop Drawings, Commercial Construction, Submittals, Material Engineering, Production Documentation.

Tools & Systems:

AutoCAD 2D/3D, Innergy ERP, ShopPAK, ProjectPAK, Bluebeam, CNC Programming.

Executive Summary:

A highly experienced Engineer with extensive expertise in commercial architectural millwork and production documentation. Combines technical proficiency with decades of industry experience to deliver accurate engineering packages for complex construction projects.

Ideal For:

Architectural millwork firms, engineering organizations, and manufacturing companies seeking a senior Engineering or Drafting professional.

★ Candidate ID: JO275304 – Production Manager / Shop Manager / Shop Foreman / Shop Lead

Why This Candidate Stands Out

A seasoned woodworking professional with over 20 years of experience managing custom architectural millwork, casework, cabinetry, furniture, and remodeling projects across both commercial and residential markets. Their hands-on leadership and end-to-end production expertise make them an excellent fit for high-volume manufacturing environments.

Key Highlights:

- 20+ years of woodworking and production leadership experience
- Manages 1–8 concurrent projects
- Maintains approximately 20% profit margins
- Extensive experience in custom millwork, cabinetry, and furniture
- Strong blueprint interpretation and estimating expertise
- Skilled in scheduling, installation, and field coordination
- Established network of GCs, subcontractors, and architects

Scope of Expertise:

Production Management, Architectural Millwork, Cabinetry, Estimating, Scheduling, Installation Management, Blueprint Interpretation, Quality Assurance, Commercial Construction, Team Leadership.

Tools & Systems:

Bluebeam, ProCore, Microsoft Office Suite, Google Workspace.

Executive Summary:

A highly experienced production leader with extensive knowledge of custom woodworking operations. Combines hands-on craftsmanship with operational leadership to improve production efficiency, maintain profitability, and deliver high-quality projects.

Ideal For:

Woodworking manufacturers, millwork companies, and custom cabinetry organizations seeking a Production Manager, Shop Manager, or Shop Foreman.

★ Candidate ID: RB74275 – Operations Manager / General Manager / Director of Operations

Why This Candidate Stands Out

A strategic operations executive with extensive experience leading high-volume cabinetry manufacturing and plant operations. Their expertise in Lean Manufacturing, automation, and process improvement has significantly enhanced productivity while reducing labor requirements and improving on-time delivery.

Key Highlights:

- Oversees production of 1,700+ cabinetry units per week
- Led installation of over 45 production machines
- Implemented a \$2.5M robotic automation system
- Increased output by 25% while reducing labor requirements
- Strong Lean Manufacturing, Six Sigma, and Kaizen expertise
- Extensive plant expansion and facility planning experience
- Advanced CNC and manufacturing process knowledge

Scope of Expertise:

Operations Management, Plant Management, Lean Manufacturing, Continuous Improvement, Custom Cabinetry, CNC Operations, Automation, Process Optimization, Facility Planning, Executive Leadership.

Tools & Systems:

AutoCAD 2D, Salesforce, Seradex ERP, Paycom, Microsoft Office Suite.

Executive Summary:

An accomplished operations leader with extensive experience optimizing manufacturing environments through automation, process improvement, and strategic leadership. Combines technical expertise with operational excellence to drive productivity and business growth.

Ideal For:

Cabinet manufacturers, architectural millwork organizations, and woodworking companies seeking a Director of Operations, General Manager, or Plant Leader.

★ Candidate ID: RB278501 – Production Engineer / Lead Engineer / Drafter

Why This Candidate Stands Out

A highly skilled Production Engineer with extensive experience supporting luxury residential and commercial millwork projects. Their expertise in CNC programming, production optimization, and woodworking materials enables them to bridge engineering and manufacturing while maintaining exceptional quality standards.

Key Highlights:

- Supported luxury residential projects valued up to \$2M
- Extensive experience with custom millwork and cabinetry
- Advanced CNC programming and machining expertise
- Strong production workflow optimization capabilities
- Extensive finishing systems and material knowledge

- Skilled in troubleshooting CNC equipment and PLC systems
- Deep knowledge of AWI, QCP, and KCMA standards

Scope of Expertise:

Production Engineering, CNC Programming, Architectural Millwork, Cabinet Vision, Manufacturing Optimization, Process Improvement, Finishing Systems, Production Support, Drafting, Lean Manufacturing.

Tools & Systems:

Cabinet Vision, S2M, AlphaCAM, WoodWOP, bSolid, Innergy ERP, eLeads, Salesforce, Microsoft Office Suite.

Executive Summary:

A technically advanced Production Engineer with extensive expertise in CNC manufacturing, architectural millwork, and process optimization. Combines engineering knowledge with hands-on production experience to improve efficiency, quality, and manufacturing performance.

Ideal For:

Architectural millwork manufacturers, custom cabinetry companies, and woodworking organizations seeking a Production Engineer, Lead Engineer, or Senior Drafter.
